

RAMEZ ZORGUI

IT Engineer

Ariana , Tunisie | +216 29 722 903 | ramezzorgui74@gmail.com | LinkedIn : [Ramez Zorgui](#) | GitHub : [Ramezzorgui](#) | Portfolio : [Ramez Zorgui](#)

PROFILE

Computer Science Engineer graduate from ESPRIT, specializing in full-stack development and DevOps. Versatile and skilled in modern web technologies as well as CI/CD automation tools. Rigorous, solution-oriented, and a strong team player, I effectively collaborate with cross-functional stakeholders to deliver complex projects successfully. I am seeking a growth-oriented role as a Fullstack Developer or DevOps Engineer to contribute to large-scale projects in a technically demanding environment.

EDUCATION

National Engineering Degree in Computer Science: Tunis, Tunisia

September 2023 – July 2026

Private Higher School of Engineering and Technology (ESPRIT)

Bachelor's degree in Computer Systems Engineering: Kasserine, Tunisia

September 2020– June 2023

Higher Institute of Applied Sciences and Technology of Kasserine(ISSAT)

EXPÉRIENCE PROFESSIONNELLE

Final Year Project: Multi-tenant SAP Application Maintenance Platform

CSI Digital, Tunis

Technologies : Spring Boot, Angular, Keycloak, Docker, AKS, Azure DevOps, Stripe, Flask, Grafana

January 2026 – July 2026

- Multi-tenant full-stack application for SAP ticket management (incidents, changes, support) with per-client data isolation.
- Features SSO authentication (Keycloak), Stripe payments, an AI chatbot (NLP), and SLA/MTTR dashboards.
- Utilizes Docker containerization, AKS orchestration, an Azure CI/CD pipeline (build, tests, Trivy, deployment), and Grafana monitoring.
- Project executed using the Agile (Scrum) methodology.

Engineering Internship – Development of an innovative web application for automated presentation generation

MediaLab Factory, Bizerte

Technologies: Angular-Spring Boot

July 2025 – August 2025

- Designed and developed a full-stack web application integrating an AI API (Gemini API) for automated content generation.
- Implemented advanced features: WYSIWYG editing, multi-format export (PDF, PPTX, PNG/JPG), and customizable template management.
- Secured access via JWT authentication and role-based access control.
- Containerized the application using Docker and implemented an automated CI/CD pipeline (build, test, and deploy) to ensure delivery quality and speed.
- Collaborated with the team to ensure functional compliance and product quality.

Corporate Internship: Development of a platform for managing international study mobility

Private Higher School of Engineering and Technology (ESPRIT)

July 2024 – Aout 2024

Technologies: Symfony-MySQL

- Development of a website for managing international student mobility.
- Implementation of the application architecture, database, user interfaces, and user interactions (front-end and back-end).
- Implementation of features (authentication/CRUD) and API integration.

Trainee Technician – Final-Year Project: Implementation of a Big Data architecture

SFM Technology, Tunis

Technologies: Apache Hadoop-Apache Spark-IntelliJ

February 2023 – April 2023

- In-depth knowledge of the Linux operating system.
- Understanding and analysis of business requirements.
- Preparation of a Big Data architecture.

PROJETS

AI-Learning – Plateforme Éducative Intelligente

Private Higher School of Engineering and Technology (ESPRIT)

September 2025 – November 2025

Technologies : Django REST Framework, MongoDB, Bootstrap 5 , Python, Docker, API IA/ML (Transformers, Instructor, OCR)

- Development of an AI-powered educational platform featuring content sharing, adaptive quizzes, semantic search, plagiarism detection, intelligent summarization, and user dashboards.
- Integration of AI tools and external APIs, and management of deployment using Docker, Jenkins, and a CI/CD pipeline.

CI/CD Automation with Jenkins

Private Higher School of Engineering and Technology (ESPRIT)

Technologies : Jenkins, Docker, SonarQube, Nexus, Prometheus, Grafana, Mockito, JUnit, Maven

February 2025 – May 2025

- Automated application deployment via CI/CD pipeline using Jenkins.
- Maven builds, unit testing (Mockito, JUnit), and code analysis with SonarQube.
- Containerization with Docker, orchestration via Docker Compose, and publishing to Docker Hub.

Web Development Project: Intelligent Emergency Management System

Private Higher School of Engineering and Technology (ESPRIT)

Technologies : MERN STACK (Express.js, Node.js, React.js, MongoDB)

February 2024 - May 2024

- Facial recognition authentication for fast and secure user login.
- Intelligent triage chatbot based on Natural Language Processing (NLP).
- Smart ambulance coordination with real-time updates on ambulance location, patient symptoms, and hospital readiness.
- Support for self-transport, allowing patients to submit medical data in advance for better hospital preparation.
- Intelligent medical routing that automatically categorizes urgency levels.
- CI/CD pipeline for automated deployment and testing, enabling rapid and reliable updates.

Web Development Project: Culturium

Private Higher School of Engineering and Technology (ESPRIT)

Technologies : Symfony, Twig, Bootstrap, MySQL, UML.

March 2024 - May 2024

- Development of a product and event management website.
- Design of the application architecture, database, user interfaces, and user interactions (front-end and back-end).
- Implementation of product and event management features (CRUD).
- Creation of the application's graphical interfaces using Twig and Bootstrap.
- Integration of various APIs.

Mobile Development Project: Culturium

Private Higher School of Engineering and Technology (ESPRIT)

Technologies : FLUTTERFLOW , FireBase

March 2024 - May 2024

- Design and development of a mobile application using FlutterFlow to streamline the development process.
- Collaboration with the team to define key features and the user experience.
- Use of Flutter to customize and extend the application's functionality.
- Integration of features such as user management, smooth navigation, and database connectivity.

Skills

Programming languages and frameworks:

HTML, CSS, JavaScript, Angular, spring boot, Flutterflow, Symfony, JavaFX, Express.js, Node.js, React.js, Unix, .NET

DevOps and CI/CD tools:

CI/CD Pipelines, Docker, Jenkins, Nexus Repository Manager, SonarQube, Prometheus, Grafana, AzureDevops, AKS
