PROFILE

Motivated and ambitious Computer Engineering student at ESPRIT, specializing in Web Development and DevOps. Passionate about building innovative and efficient software solutions, with strong experience in full-stack development and CI/CD automation. Currently seeking a PFE internship to apply my technical expertise and commitment to continuous learning.

EDUCATION

Computer Engineering Program, Specialization in Web Development (ESPRIT)	<i>2023 – 2026</i>
Bachelor's Degree in Computer Systems Engineering (ISSAT Kasserine)	<i>2020 – 2023</i>

PROFESSIONAL EXPERIENCE

Engineering Internship – Development of an innovative web application for generating automatic presentations	<i>July 2025 – August 2025</i>
MediaLab Factory, Bizerte	

- Designed and developed a full-stack web application with advanced features, including multi-format export and customizable templates, and secure access via JWT authentication and role management.
- Integrated an AI API (Gemini API) and managed deployment through Docker and an automated CI/CD pipeline for testing and rapid delivery.

Corporate Immersion Internship – Development of an international study mobility management platform	<i>E</i>
SPRIT, Tunis July 2024 – August 2024 ESPRIT, Tunis	

- Developed a website for managing international student mobility.
- Implementation of the application architecture, database, user interfaces, and user interactions (front-end and back-end).
- Implementation of features (authentication/CRUD) and API integration.

PROJECTS

AI-Learning – Plateforme Éducative Intelligente	<i>September 2025 – November 2025</i>
Technologies: Django REST Framework, MongoDB, Bootstrap 5 (Sneat Template), Python, Celery, Redis, Docker, AI/ML APIs (Transformers, Whisper, Instructor, OCR)	

- Developed an AI-assisted educational platform with features for content sharing, adaptive quizzes, semantic search, plagiarism detection, intelligent summarization, and user dashboards.
- Integrated AI tools and external APIs, and managed deployment through Docker, Jenkins, and CI/CD pipelines.

Automatisation CI/CD avec Jenkins	<i>February 2025 – May 2025</i>
Technologies: Jenkins, Docker, SonarQube, Nexus, Prometheus, Grafana, Mockito, JUnit, Maven	

- Automated application deployment through a CI/CD pipeline using Jenkins.
- Performed Maven compilation, unit testing (Mockito, JUnit), and code analysis with SonarQube.
- Utilized Docker for containerization, orchestrated with Docker Compose, and published to Docker Hub.

Web Development Project – Intelligent Emergency Management System	<i>February 2025 – May 2025</i>
Technologies: MERN Stack (MongoDB, Express.js, React.js, Node.js)	

- Developed an intelligent emergency management system with facial recognition login, NLP-based triage chatbot, ambulance dispatch coordination, patient self-transport support, and automated emergency level classification.
- Implemented CI/CD pipeline for automated testing and deployment, ensuring fast, reliable updates and system scalability.

SKILLS

Programming Languages: JavaScript, Java, SQL

Frameworks & Libraries: React, Node.js, Angular, Express.js

Web Technologies: HTML, CSS, JavaScript

Databases: MySQL, MongoDB, PostgreSQL

Cloud & DevOps: AWS, Azure, Docker, Jenkins, Kubernetes, Prometheus, Grafana, Vagrant, SonarQube, Nexus, DockerHub

Development Tools: Git, GitHub

Methodologies: Agile, Scrum, DevOps
